

Sustainability Policy

There is a growing sense of urgency to address sustainable development at all levels of the construction industry. This is reinforced by recent reports on global issues such as climate change, water scarcity and Third world poverty. We acknowledge Resource Efficiency is an important aspect for smart sustainable and inclusive growth.

OUR COMMITMENT

As one of our countries leading industries, the construction industry has a major impact on the sustainability of America and beyond. It affects most aspects of our lives, the environment and economies worldwide.

As part of our commitment to sustainable construction Pitt Construction considers the sustainability implications of operating materials, construction projects and related activities.

Sustainable Consumption and Production

We will undertake all construction and reclamation activities in line with the following Targets:

Sustainable Consumption and Production

- *Reuse and recycle resources on site, through sustainable management of materials, to reduce and ultimately eliminate waste in construction.*
- *Re-use existing equipment assets*
- *Follow Sustainable Procurement Policies and Procedures.*

Climate Change and Energy

- *Minimize carbon emissions during construction.*

Natural Resources and Enhancing the Environment

- *Increase the use of energy efficient solutions in design and material resources, while considering the whole life costs, to reduce environmental impacts from the use of energy, resources and hazardous substances.*
- *Minimize and conserve natural resources such as stone, timber and water.*
- *Proactively create, manage and enhance wildlife habitats and natural landscapes.*

Creating Sustainable Communities

- *Contribute to social and economic regeneration by employing and nurturing a committed, skilled and adaptable workforce, working in an environment of zero accidents and incidents with appropriate arrangements for education and training, employment, health and safety.*
- *Become involved in our local community environmental stewardship efforts.*
- *Identify and assess sustainability issues that can affect projects during development, design, construction and operation; identify and implement activities to manage these issues consistent with customer goals and requirements, Pitt Construction policies and standards, and relevant external guidelines.*

This policy statement will be communicated to all persons working for and on behalf of Pitt Construction and any other relevant stakeholders.

This policy supports our overall Sustainability policy and our responsible business strategy.

David D. Pitt
President and CEO
